ABOUT US

Royal technologies is a House of technology that infuses engineering with imagination, we offer a wide range of advanced solutions and services And global leader in the design, manufacturing and services of boiler and industrial fabrication. Offering customers a wide range of customized cost effective fabrication solutions. Our organization was established in 1997. We have highly qualified supervisory staff and technical Experienced labours.

VISION AND MISSION

- To be most sought after, Efficient, Profitable, and respected power generation through boiler.
- To produce the heights quality boiler mounting accessories, fabrications and services
- To provide the best value proposition in terms of cost and quality of products and services to our customer in the Sugar plants automobile plants and industries
- To do through whole hearted commitment to the quality systems.

STRENGTH & CORE VALUES:

- Prompt and Result oriented decisions
- Honesty and integrity in dealing with the customers.
- Clarity in dealing with the customers and respecting the commitments made to customers.
- Quality service to our customers And continuous effort to improve our process and strategy to meet the changing need of the customers.
- Committed to quality. committed to time
- Fairness.
- Diversity.

COMMITMENT FOR YOU:

Our commitments are an expression of our desire to give you high quality services and to keep in mind the expectation that you have told us about in our opinion polls. Our commitment extend to everyone who calls upon the our services concerning.

ENVIRONMENT HEALTH & SAFETY(EHS) POLICY

OUR MOTTO:

- ❖ Environment, Health And Safety
- ❖ Quality
- ❖ Speed
- ❖ High Performance

Royal Technologies has committed to provide safe and healthy working environment to all employees and our customers as an integral part of business.

- To ensure safety and health of our employees by creating awareness among them.
 - To take care all employees' health by frequently health checks up.
 - To provide them with necessary training to achieve our safety goals.
 - To minimize accident eliminating all unsafe act and unsafe condition.
 - To minimize risk of person and material by adopting safe method.
 - To comply with all safety rules and regulations.
 - To minimize air water and noise pollution by using environment friendly equipments.
 - To give top priority to safety, quality during production and execution
 - To accomplish proper waste management
-
- ❖ We are committed to continuous improvement and it is essential that every one participate, co-operate be seen actively support the requirement.
